M ANUSREE

Hyderabad, Telangana 5090075 | 9014704748 | anusreereddymarri@gmail.com
http://www.linkedin.com/in/anusree-reddy

Summary

Highly motivated IT student specializing in Python, Machine Learning (ML). Experienced in time-series forecasting and ML project development, having completed hands-on projects like EV demand prediction and mood-tracking applications. Gained foundational knowledge in AWS and Generative AI, and earned the AWS Machine Learning Foundations badge.

Academic Qualifications

Expected in June 2027
Chaitanya Bharathi Institute of Technology, Hyderabad
B.E IT, GPA: 9.62/10

January 2023
Sri Chaitanya Junior College, Hyderabad
XII, GPA: 98.8%

January 2021
Chaitanya Central School, Hyderabad
X, GPA: 97%

Skills

- Programming : Python (primary), Java (basic OOP)
- Web: HTML, CSS, JavaScript
- Database: SQL, DBMS concepts
- DSA: Arrays, Recursion, Sorting, Linked Lists, Stacks, Queues
- Soft Skills: Effective Communication, Team Collaboration

Projects

EV Charging Demand Prediction | LINK
- Engineered and deployed a high-accuracy predictive machine learning model to forecast EV charging demand, achieving 92% accuracy.
- Executed advanced data preprocessing, feature extraction, and time-series analysis in Python to enhance model efficiency.
- Analyzed regional and temporal charging patterns to generate insights supporting sustainable EV infrastructure planning.

Mood Journal Application | LINK
- Developed a mood-tracking app enabling users to log daily emotions with six custom emojis and add personal notes.
- Tracked over 100 mood entries to help users monitor emotional trends and patterns over time.
- Integrated personalized song suggestions and daily inspirational quotes to enhance user engagement.

Virtual Classroom Management System | LINK
- Built a Python-based e-learning platform with role-based authentication and access control, reducing manual grading time by 30% through integrated quizzes and assessments.
- Designed student features to track attendance and view performance summaries.

Experience

Edunet Foundation (in collaboration with Shell AICTE) [2025]– Virtual
AI & Green Skills Intern(July 2025 – August 2025)
- Completed a 4-week AICTE-certified internship on AI for sustainability
- Contributed to an EV Charging Demand Prediction project using Python and machine learning.
- Performed data analysis, time-series forecasting, and data visualization tasks.

Certifications

- Amazon Future Engineer (AFE) Bootcamp – DSA | LINK
- AWS Machine Learning Foundations – Cedly | LINK
- Intro to Generative AI with AWS – Udacity | LINK
- MongoDB Python Developer Associate-MongoDB.Inc | LINK
- Web Development – Internshala | LINK

Coursework Subjects

- Object-oriented programming
- Database Management System

Leadership & Activities

- Team Lead, Smart India Hackathon - Guided a team of five members to develop a cultural website during the event.
- **Collaborated** on a time-bound coding challenge as a participant in the 24-hour hackathon by COSC, CBIT.
- Member of the Chaitanya Spandana Club at CBIT — actively engaged in student initiatives and community activities
- Cricket team member, CBIT — contributed to winning the tournament at Shruthi, the annual college sports event

Accomplishments

- Recipient of the FFE Scholarship (Foundation for Excellence)

Languages

- Telugu — First Language
- English — Upper Intermediate (B2)
- Hindi — Intermediate (B1)

Hobbies and Interests

- Enjoy tackling challenges and developing creative solutions
- Team sports participation (cricket) to develop teamwork, leadership, and discipline skills
- Active in dance, enhancing creativity, coordination, and self-motivation
